

It's all in the detail

Clear Labelling

All of our garments are clearly labelled in the areas of sizing, men's or ladies' fit and the country of origin.

Quality Control

Our garments need to meet high standards and this is overseen by our team of quality control specialists.

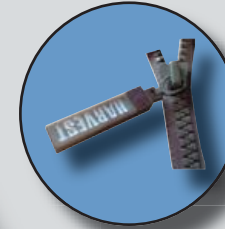

High Quality Fabrics

Our garments are made from the highest quality fabrics available and our polos and business shirts are made from 100% cotton. Our business shirts are treated with "easy care" to make ironing easier. We have also collaborated with some of the best brands - Dupont Lycra, Dupont Hollofil and Finetex.

Detailed Care Instructions

All of our garments come with detailed care instructions to ensure that you get the very best out of your garments.

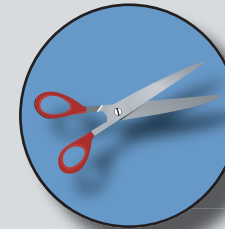

Superior Fittings

An engraved button, a YKK zip or toggles that are accessed through your pocket - James Harvest only use the best available fittings.

That Extra Detail

Throughout our garment range you will find that we have gone that extra way ... embossed lining, sculptured velcro, water-proof zips and seams, French cuffs - just to name a few.

Superior Cut

Our team of design experts monitor the latest trends, whilst ensuring that our garments are functional and comfortable.

Superior Finishing

Every detail in the process of our garment production is taken into account and that includes how we finish our garments. Our seams are covered in all of our business shirts, this not only looks good but also makes our garment easier to iron.

James Harvest Sportswear ... when only the best will do!
